How to Hide Old Courses in Blackboard

At the beginning of the year you may still have courses listed in Blackboard that you are no longer taking.

They may be left over from a previous school. If you’re a continuing student, they may be left over from the previous year.

To hide these courses, please follow the steps outlined below:

Log in to Blackboard using your MIS ID and password

When you’re logged in, locate and click on the cog symbol (or S symbol) next to the heading My Courses.

Take the tick out of the boxes under the Course Name heading on the My eLearn tab for any courses you wish to hide. Then click Submit (at the bottom or top right of the screen).

You will now notice that the courses you have taken the ticks out for are no longer listed under my courses.
